	:				

Two kilometers north of Zabkowice (Frankenstein -P51/H45) there is a former German factory which was called Nikelwerke (sic). It is now the property of Wojslawice (Kirchlinden) and is engaged in mining or atomic work (sic). There is a possibility of uranium mining. The ores extracted are red and blue. The factory is under heavy military guard. Employees are wirtually prisoners. The extracted ores stain the clothes very heavily, especially the red ore. The working time is twenty-four hours a day.
